KNOWLEDGE INSTITUTE OF TECHNOLOGY

(An Autonomous Institution)

Approved by AICTE, Affiliated to Anna University, Chennai.

Accredited by NBA (CSE, ECE, EEE & MECH), Accredited by NAAC with "A" Grade KIOT Campus, Kakapalayam (PO), Salem – 637 504, Tamil Nadu, India.

B.E. / B.Tech. Regulations 2023

B.TECH. – Artificial Intelligence and Data Science

Curriculum and Syllabi

(For the Students Admitted from the Academic Year 2023-24 Onwards)

Version: 1.0	Date: 09.09.2023

KNOWLEDGE INSTITUTE OF TECHNOLOGY(AUTONOMOUS), SALEM -637504

B.E. / B.Tech. REGULATIONS 2023 (R 2023) CHOICE BASED CREDIT SYSTEM AND OUTCOME BASED EDUCATION

B.TECH. – ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

VISION OF THE INSTITUTE

To be a world class institution to impart value and need based professional education to the aspiring
youth and carving them into disciplined world class professional who have the quest for excellence,
achievement orientation and social responsibilities.

MISSI	MISSION OF THE INSTITUTE							
Α	To promote academic growth by offering state-of-art undergraduate, postgraduate anddoctoral programs and to generate new knowledge by engaging in cutting – edge research							
В	To nurture talent, innovation, entrepreneurship, all-round personality and value system among thestudents and to foster competitiveness among students							
С	To undertake collaborative projects which offer opportunities for long-term interaction withacademia and industry							
D	To pursue global standards of excellence in all our endeavors namely teaching, research, consultancy, continuing education and support functions							

VISION OF THE DEPARTMENT

To create globally competent software professionals with social values to cater the ever-changing Industry requirements.

MISSION OF THE DEPARTMENT								
M1	To inculcate innovation and creativity through experiential learning with the modern infrastructure and technologies.							
M2	To collaborate with the industry for enhancing the students' research ability on cutting edge technologies of AI and Data Science.							
М3	To develop competent industry-ready professionals with right attitude, values and ethics.							

PROGRAM ED	PROGRAM EDUCATIONAL OBJECTIVES (PEOs)									
PEO 1	PEO 1 Perform data processing, analysis and visualization in real time applications for better prediction and data-driven decision making.									
PEO 2	Enable multitasking for existing resources and execute complex tasks using Artificial Intelligence.									
PEO 3	Carry out fundamental research to cater the critical needs of the society through cutting edge technologies of AI.									

PROGRA	AM OUTCOMES (POs)
Engineer	ing Graduates will be able to:
PO1	Engineering knowledge: Apply the knowledge of mathematics, science, engineeringfundamentals and an engineering specialization to the solution of complex engineeringproblems.
PO2	Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
PO4	Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineeringactivities with an understanding of the limitations.
PO6	The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
PO7	Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, andneed for sustainable development.
PO8	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	Individual and team work: Function effectively as an individual, and as a member orleader in diverse teams, and in multidisciplinary settings.
PO10	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend andwrite effective reports and design documentation, make effective presentations, and giveand receive clear instructions.
P011	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a memberand leader in a team, to manage projects and in multidisciplinary environments.
PO12	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technologicalchange.
Progran	n Specific Outcomes (PSOs)
	successful completion of B.Tech. Programme in Artificial Intelligence and Data Science, the s will able to
PSO 1	Apply the concepts of Machine Learning and Data Science to solve the real time business problems.
PSO 2	Exhibit their professional skills in team building, leadership, communication, values and ethics.
PSO 3	Build a suitable model to assist business analytics and helps solving business problems.

Upon	completion of this course the students will be able to:	Taxonomy
CO1	Describe knowledge of matrices with the concepts of eigenvalues to study their problems in core area.	L3 – Apply
CO2	Familiarize differential calculus tools in solving various application problems.	L3 – Apply
CO3	Solve basic application problems described by second and higher order linear differential equations with constant coefficients.	L3 – Apply
CO4	Apply basic concepts of integration to evaluate line, surface and volume integrals.	L3 – Apply
CO5	Apply the basic techniques and theorems of functions of several variables in other area of mathematics.	L3 – Apply

	BE23CY201 ENGINEERING CHEMISTRY Version: 1.0													
(COMMON TO ALL BRANCHES)														
Progr	ramme &	СР	L	T	Р	С								
	se Objectives:		3	3	U	U	_ 3							
1	To illustrate the b	poiler feed water requirements, related problems and water tr	eatme	ent te	echni	ques								
2	To impart knowle	edge on the Preparation, properties and applications of engine	ering	mate	erials									
3	To elaborate the Principles of electrochemical reactions, redox reactions in corrosion of materials and basics of polymers.													
4	To outline the pri	nciples and generation of energy in batteries and fuel cells.												
5	To introduce the	concepts of industry safety precautions and its standards.												

UNIT-I WATER AND ITS TREATMENT

Need for water treatment (L1) – applications (L1), Water resources (L1) - Hardness of water (L1) – types – expression of hardness (L1) – units – estimation of hardness of water by EDTA (L2) – numerical problems (L2) - treatment of boiler feed water (L1) – Internal treatment (phosphate, colloidal, sodium aluminate and calgon conditioning) (L2) external treatment(L2) – Ion exchange process, zeolite process (L2) – desalination of brackish water (L2) – Reverse Osmosis (L2).

UNIT-II NANO MATERIALS AND PREPARATIONS

Applications of nanomaterials in medicine, agriculture, energy, electronics and catalysis (L2). Optical material for smart screen (LED, LCD & OLED) (L1). Fundamentals of nano science - Basics: Distinction between molecules, nanomaterials and bulk materials (L1) - Size-dependent properties (optical, electrical, mechanical and magnetic) (L1)-Types of nanomaterials-Definition, properties and uses of - nanoparticle, nanocluster, nanorod, nanowire and nanotube (L2) - Preparation of nanomaterials (L2).

UNIT- III ELECTROCHEMISTRY AND POLYMERS

Electro chemistry; Need and applications (L1). Electrochemical cell (L1) – redox reaction (L1) – electrochemical series and its significance (L1) – Nernst equation (L2). Corrosion- causes- factors- types-chemical, electrochemical corrosion (galvanic, differential aeration), corrosion control (L2) – electrochemical protection (L2) – sacrificial anode method (L2). Polymers; Need and applications (L1). - Classification of polymers (L1) – Natural and synthetic; Thermoplastic and Thermosetting (L1). Functionality – Degree of polymerization. Preparation, properties and uses of Nylon 6,6, and Epoxy resin (L2).

UNIT – IV BATTERIES AND FUEL CELLS 9

Batteries: Need and applications (L1). Energy storage devices classification (L1) – Batteries - Types of batteries, Primary battery (L1) – dry cell, Secondary battery (L1) – lead acid battery (L2) - lithium-ion battery (L2) - Electric vehicles introduction – working principles (L2) - Fuel cells - H_2 - O_2 fuel cell (L1) - Microbial fuel cell - Super capacitors (L1) - Storage principle (L1) - types and examples (L2).

9

9

UNIT-V CHEMISTRY, ENVIRONMENT AND WASTE 9 MANAGEMENT

Chemical pollution (L2) – Norms and Standards (L1) – Safety Precaution (L2) – Importance of Green chemistry - E-wastes and its management (L2) – Carbon foot print and its calculations (L2) - CO_2 emission and its impact on environment (L2) – Techniques for CO_2 emission reduction (L2).

OPEN ENDED PROBLEMS / QUESTIONS

Total : 4!	5 PERIODS
	BLOOM'S Taxonomy
Infer the quality of water from quality parameter data and propose suitable treatment methodologies to treat water.	L2 – Understand
Identify and understand basic concepts of nanoscience and nanotechnology in designing the synthesis of nanomaterials for engineering and technology applications.	L2 – Understand
Outline the basics of electro chemistry and polymers	L2 – Understand
Summarize about the various advanced power storage devices working principles and its applications.	L2 – Understand
Illustrate the basic concepts of safety standards in industry and carbon credit.	L2 – Understand

BE23GE301	OVERVIEW OF ENGINEERING AND TECHNOLOGY	Version: 1.0					
	(COMMON TO ALL BRANCHES)						
Programme &	B.TECH ARTIFICIAL INTELLIGENCE AND DATA SCIENCE	СР	L	Т	Р	С	
Branch	B. IECH ARTIFICIAL INTELLIGENCE AND DATA SCIENCE	3	3	0	0	3	

Course Objectives:

- 1 To Outline the basics of the Civil Engineering Program.
- 2 To learn the fundamentals of Mechanical Engineering.
- To impart Knowledge on Fundamental Concepts and recent trends in the field of Electrical and Control Systems.
- 4 To Provide the Overview of the Electronics and Communication Engineering Program.
- 5. To Provide a Comprehensive overview of the field of Computer science, from its historical roots to most cutting-edge developments.

Unit – I INTRODUCTION TO ENGINEERING & TECHNOLOGY (NOT FOR EXAMINATION) 7

Science, Engineering and Technology(E&T), Approaches for a Scientific process vs an Engineering process; Engineering Product Life Cycle, processes in Engineering Design Methodology with few examples; various branches in Engineering and Technology (Traditional and Recent), Impact of E&T on human life, (pros & cons); Activities performed by an Engineer, Interdisciplinary nature of real world problems; Revised Bloom's Taxonomy Levels (BTL) and Engineering Teaching Learning Process (TLP); Structure, Duration and BTL levels in UG, PG & Ph.D. level Education in E&T, History of E&T development and emerging fields in E&T.

Unit – II OVERVIEW OF CIVIL ENGINEERING 6

Introduction (L1) – Major Areas of Study (L2): Architecture and Town Planning, Structural Engineering, Construction Engineering and Management, Hydrology and Water Resources Engineering, Environmental Engineering, Transportation Engineering – Historical Perspective (L2) – Few Practical Applications* (L2): (i) Single Story Residential Building, (ii) Roads and Highway Network (iii) Dam, Canals and Irrigation layout, (iv) Sewage System and its Treatment – Recent Developments / Current Areas of Research (L2).

Unit – III OVERVIEW OF MECHANICAL ENGINEERING 8

Introduction (L1) – Major Areas of Study (L2): World Energy Scenario, CO2 and other Emissions and Climatic Change, Energy Conservation Systems, Mechanical Design, Manufacturing and Industrial Engineering – Historical Perspective (L2) – Few Practical Applications* (L2): (i) Thermal Power Plant, (ii) Air Conditioning Systems, (iii) Automobile (Car / Truck), (iv) Mechanical Design of a Component using CAD, (v) Assembly Line of a Car manufacturing Plant (vi) Machines in a Textile Spinning Industry – Recent Developments / Current Areas of Research (L2).

Unit – IV OVERVIEW OF ELECTRICAL AND CONTROL SYSTEMS ENGINEERING

Electrical Engineering: Introduction (L1) – Historical Perspective (L2) - Major Areas of Study (L2): Electrical Power Generation, Transmissions and Distributions, Motors, Sensors, Instrumentation & Control System, and Lighting System, Distributed Power Generation and Consumption - Few Practical Applications* (L2): (i) Generators (ii) Transmission Systems (iii) Home Appliances: Rating, Load Estimations and Wiring (iv) Electrical Appliances: Induction Stove, BLDC Fan vs Ordinary Fan - Electric Vehicle - Recent Developments / Current Areas of Research (L2).

Control Systems Engineering: Introduction (L1) – Control Systems Layout, Open Loop and Closed Loop, System Response or Time Constant, – Few Practical Applications* (L2): Mechanical, Hydraulic, Pneumatic, Electrical, Electronics / Embedded Control Systems and Computer Based Control Systems (PLC and SCADA).

Unit – V OVERVIEW OF ELECTRONICS AND COMMUNICATION ENGINEERING

9

Introduction (L1) – Major Areas of Study (L2): Electronic Devices and Circuits, Analog Electronics, Digital Electronics, Embedded Systems, Integrated Circuits & VLSI – Historical Perspective (L2) – Few Practical Applications* (L2): (i) Audio Systems, (ii) Automotive Electronic Systems – Recent Developments / Current Areas of Research (L2)

Introduction (L1) – Major Areas of Study (L2): Signal Processing, Analog and Digital Communication, Data Communications and Networking – Historical Perspective (L2) – Few Practical Applications* (L2): (i) Text to Speech / Voice to Text Application in Google Search, (ii) Wired and Wireless Communications Network, (iii) Satellite Communications, (iv) IoT Communications Network – Recent Developments / Current Areas of Research (L2).

Unit – VI OVERVIEW OF COMPUTER SCIENCE AND ENGINEERING

6

Introduction (L1): Evolution of Computers / Generation Computers – Major Areas of Study (L2): Computer Hardware, Programming Languages, Operating Systems, Application Software, Database Management Systems (DBMS), Computer Networks, Internet and Computer Security, Web Technology, Social Media, Mobile Application – Recent Developments / Current Areas of Research (L2): Artificial Intelligence (AI) and Machine Learning (ML), Internet of Things (IoT), Block Chain, Big Data Analytics, Cyber Security, Cloud Computing.

* Purpose or Use, Actual System (Photo), Layout or Block Diagram, Description, Operational Aspects and Inputs/Outputs are to be taught (Descriptive level only).

Total: 45 PERIODS

OPEN ENDED PROBLEMS/QUESTIONS

	completion of this course, the students will be able to:	BLOOM'S Taxonomy
CO1	Identify the major areas and relate their current trends in Civil Engineering.	L2-Understand
CO2	Explain the principles behind various mechanical systems and components.	L2-Understand
CO3	Identify different Electricals and Control Systems applied in the Engineering field.	L2-Understand
CO4	Relate the various Electronics and Communication Engineering Systems involved in real life.	L2-Understand
CO5	Understand the components of Computer Hardware, Software, and Operating Systems and their applications in real life.	L2-Understand

Files: Introduction(L2) - Text Vs Binary Files(L2) - File Modes(L3) - Defining and Opening a File(L3) - Closing a File(L3) - Input/output Operations on Files(L3) - Random Access Files(L3).

Preprocessor Directives: Introduction(L2) - File Inclusion(L3) - Macro Definition(L3) - Conditional Compilation(L3). Command Line Arguments(L3) - Variable Length Arguments List(L3).

TOTAL: 45 PERIODS

LIST OF EXPERIMENTS/EXCERCISES:

- 1. Implementation of algorithm, flowchart and pseudo code to solve simple problems.
- 2. Implementation of if, if-else, nested if and switch statements.
- 3. Implementation of while, do-while and for loops.
- 4. Implementation of sorting and searching algorithms.
- 5. Implementation of one dimensional array, passing array to functions and array operations.
- 6. Implementation of programs for implementing various string operations like "copy", "finding length", "compare", "concatenate" with and without built-in library functions.
- 7. Implementation of pointer operators, call by reference, pointers with array.
- 8. Implementation of function calls, recursion, call by value.
- 9. Implementation of structure and nested structure.
- 10. Implementation of array of structures.
- 11. Implementation of file operations.

TOTAL: 30 PERIODS

OPEN ENDED PROBLEMS / QUESTIONS

Course specific Open Ended Problems will be solved during the classroom teaching. Such problems can be given as Assignments and evaluated as Internal Assessment (IA) only and not for the End semester Examinations.

TOTAL: 75 PERIODS

	e Outcomes: completion of this course the students will be able to:	BLOOM'S Taxonomy
CO1	Construct algorithmic solutions for a given computational problem.	L3 - Apply
CO2	Demonstrate the understanding of fundamental concepts of C programming.	L3 - Apply
CO3	Utilize appropriate data structures such as arrays and pointers to solve programming problems effectively.	L3 - Apply
CO4	Apply modular programming principles and structures in C language.	L3 - Apply
CO5	Implement file I/O operations to store and retrieve data from files.	L3 - Apply
TEVT	POOKS.

Chemistry Laboratory Course Objectives: 1. To inculcate experimental skills to test basic understanding of water quality parameters, such as acidity, alkalinity, hardness, DO, chloride and copper. 2. To make the students to familiarize with electroanalytical techniques such as pH metry, potentiometry and conductometry in the determination of impurities in aqueous solutions. 3. To demonstrate the analysis of metals and alloys.

List of Experiments / Exercises

- 1. Estimation of alkalinity in water sample using Na₂CO₃ as primary standard.
- 2. Determination of total, temporary & permanent hardness of water by EDTA method.
- 3. Determination of dissolved oxygen content of water sample by Winkler's method.
- 4. Determination of chloride content of water sample by argentometric method.
- 5. Determination of strength of given hydrochloric acid using pH meter.
- 6. Determination of strength of acids in a mixture of acids using conductivity meter.
- 7. Conductometric titration of barium chloride against sodium sulphate (precipitation titration)
- 8. Study experiment on application of chemistry in a real time problem 1.
- 9. Study experiment on application of chemistry in a real time problem 2.
- 10. Study experiment on application of chemistry in a real time problem 3.

Course Outcomes: BLOOM'S Upon completion of this course the students will be able to: Taxonomy Identify the quality of water samples with respect to their acidity, alkalinity, L2 - Understand hardness and dissolved oxygen. Determine the amount of metal ions through volumetric and spectroscopic CO2 L2 – Understand techniques. Use the graphical models to analyze laboratory data. L2 - Understand CO3 CO4 Equipped with basic knowledge on conductivity meter for measurement of L2 - Understand conductance of water sample. Make use of the electroanalytical techniques to identify the impurities in solution. L2 – Understand CO5

LAAAA.

SALEM

TLP instructions : (i) Unit I, II, III will be taught using External Resource Persons on three working days

(ii) Unit IV and V will be taught by internal faculty, One period/week (in Timetable)

(11 1111)

Assessment : (i) It will be an audit course and there is no credit.

(ii) Qualitative assessment will be carried out

	BE23EN102	COMMUNICATIVE ENGLISH - II	Version : 1.0							
	(COMMON TO ALL BRANCHES EXCEPT B.TECH CSBS)									
Prog	ramme &	B.TECH ARTIFICIAL INTELLIGENCE AND DATA SCIENCE	СР	L	T	Р	С			
Bran	ch	B. IECH ARTIFICIAL INTELLIGENCE AND DATA SCIENCE	2	1	1	0	2			
Cour	se Objectives:									
1	To enable learne	rs improve their language competency.								
2	To comprehend of	documents in professional context.								
3	To develop learners' writing skills in professional framework.									
4	To strengthen lea	arners' public speaking skills.								

UNIT-I FUNCTIONAL GRAMMAR 3+3

Concept: Usage of Prepositions (L1) - Degrees of Comparison (L2) - Subject-verb Agreement (L2) - If Conditional Clause (L2) - Reported Speech (L2) - Common errors in English usage (L1).

Activity: Practice using worksheets.

5

UNIT-II READING FOR INFORMATION

3+3

Concept: Comprehending a passage (L2) - identifying a topic sentence (L2) - find specific information and prepare notes (L3) - classify the information (L2) - reading texts, essays and summarizing, Reading Technical Articles (L2) - Company Profile (L1).

Activity: Reading daily news - Reading comprehension.

To improve the interpersonal skills of the learners.

UNIT-III EXTENDED WRITING

3+3

Concept: Interpretation of charts – Pie chart, Bar chart, Flow chart (L3) - Dialogue Writing ((L2) - Writing research article (L3) – Project proposal (L2) - Official letters: Joining report, Placing order, Letter seeking clarification (L3), Acknowledging prompt/quality service (L3).

Activity: letters of inviting guest - accepting / declining offer.

UNIT – IV FOCUS ON SPEAKING SKILL 3+3

Concept: Conversation Practice in real life situations (L3) - Describing process (L2) - Pronunciation practice (L3) - Strategies of Speaking (L1) - Speaking about Scientists / Celebrities, Narrating the place of visit (L2) - Movie / book review (L2) - Compering an event (L3) - Delivering welcome address / Proposing vote of thanks (L3).

Activity: Conducting mock event.

UNIT-V FIELD STUDY 1+5

Concept: Over view of field study (L1) - Objective(s) of the survey (L1) - Methodology (L2) - Designing a questionnaire (L3) - field survey / interview techniques (L3) - Collection of data (L3) - Summarizing the data (L3) - Presentation (L3).

Activity: Based on certain specific objective(s), 3-5 persons in the society need to be interviewed - team event: 1/2/3 students per team; each team has to make a presentation.

OPEN ENDED PROBLEMS / QUESTIONS

Course specific Open Ended Problems will be solved during the classroom teaching. Such problems can be given as Assignments and evaluated as Internal Assessment (IA) only and not for the End semester Examinations.

		Total: 30 PERIODS						
	outcomes: completion of this course the students will be able to:	BLOOM'S Taxonomy						
CO1	Arrange ideas and enhance written skills.	L2 - Understand						
CO2	Identify technical context to make fair conversation.	L2 - Understand						
CO3	Write official correspondence.	L3 - Apply						
CO4	Indicate correct intonation and pronunciation.	L3 - Apply						
CO5	Summarise in the form of presentation.	L3 - Apply

TLP instructions: (i) Unit I, II, III will be taught using External Resource Persons on three working days

(ii) Unit IV and V will be taught by internal faculty, One period / week (in Timetable)

Assessment : (i) It will be an audit course and there is no credit.

(ii) Qualitative assessment will be carried out

BE23PT804	ENGINEERING CLINIC - I		Version: 1.0					
	(COMMON TO ALL BRANCHES)							
Programme &	B.TECH ARTIFICIAL INTELLIGENCE AND DATA SCIENCE	CP L		Т	Р	С		
Branch	Direction ANTIFICIAL INTELLIGENCE AND DATA SCIENCE	2	0	0	2	1		

Course Objectives:

- 1 To understand the basics of real-world applications.
- 2 To enable students to design, fabricate and demonstrate of a given application using PCB.
- To take entrepreneurship, product development, startup-related activities and problem-solving skills in higher semesters and final semester project work.

A. CONCEPT

Engineering Clinic laboratory provides hands-on training for students to develop certain simple real-world products or applications with the help of faculty. It is a team activity consisting of maximum 3 students per team. A list of products or applications will be given. Engineering Clinic - I focus on product development involving Electronics Engineering. Apart from electronic system design the course module has the design and fabrication of Printed Circuit Board (PCB) as well. Each team can choose one or more products for a given application. The students have to design, fabricate and demonstrate the working of the product.

B. EXECUTION

Day	Session	ession Course content / Activity					
4	S 1	Introduction to Electronics components.	4				
1	S 2	Functioning of Electronic components and circuits.	4				
2	S 3	Hands-on Training to design electronic circuits using open- source software.	8				
	S 4	Fabrication of PCB.	4				
2	S 5	Assembling and Soldering of Electronic components in PCB.	4				
S 6		Testing and Validation of the circuit.	6				
		Total	30 Periods				

A list of sample applications/products is attached.

C. ASSESSMENT

- i. Assessment is done by Internal mode only and there is no End Semester Examination.
- ii. Marks distribution for Infernal Assessment is,

Method	Review I	Review II	Review III	Review IV
Details	Designing of Electronic circuits using open-source software	Fabrication of PCB	Assembling and Soldering of Electronic components in PCB	Testing, Validation and Demonstration
Marks	25	25	25	25

For Product/Application the student team can choose themselves.

Total: 30 PERIODS

Cours	BLOOM'S					
Upon completion of this course the students will be able to:						
CO1	Understand the Basics of electronic components.	L2				
CO2	Design, Fabrication and Demonstration of the prototype of Electronic product using PCB.	L4				
CO3	Practice the culture of Innovation and Product Development towards Start-ups in an Institution.	L4

SALEM

List of sample Applications / Products for Engineering Clinic I

- 1. Water level indicator in a tank.
- 2. Automatic solar light circuit.
- 3. Rain alarm indicator.
- 4. Fire alarm sensor.
- 5. LPG gas leakage detector.
- 6. Air quality measurement.
- 7. Automatic sanitizer dispenser.
- 8. Automatic doorbell ringer.
- 9. Miniature of Home / Buildings / Bridges.
- 10. Miniature of Hydraulic Jack / Air Pump / Steam power electricity model.
