KNOWLEDGE INSTITUTE OF TECHNOLOGY

(An Autonomous Institution)

Approved by AICTE, Affiliated to Anna University, Chennai. Accredited by NBA (CSE, ECE, EEE & MECH), Accredited by NAAC with "A" Grade KIOT Campus, Kakapalayam (PO), Salem – 637 504, Tamil Nadu, India.

B.E. / B.Tech. Regulations 2023

B.E. – Electronics and Communication Engineering

Curriculum and Syllabi

(For the Students Admitted from the Academic Year 2023-24 Onwards)

Version: 1.0	Date: 09.09.2023

KNOWLEDGE INSTITUTE OF TECHNOLOGY(AUTONOMOUS), SALEM -637504

Approved by AICTE, Affiliated to Anna University,

Accredited by NAAC and NBA (B.E.:Mech., ECE, EEE & CSE)

B.E. / B.Tech. REGULATIONS 2023 (R 2023)

CHOICE BASED CREDIT SYSTEM AND OUTCOME BASED EDUCATION

B.E. ELECTRONICS AND COMMUNICATION ENGINEERING

VISION OF THE INSTITUTE

To be a world class institution to impart value and need based professional education to the aspiring youth and carving them into disciplined world class professional who have the quest for excellence, achievement orientation and social responsibilities.

MISSION OF THE INSTITUTE

Α	To promote academic growth by offering state-of-art undergraduate, postgraduate, and doctoral programs and to generate new knowledge by engaging in cutting – edge research
В	To nurture talent, innovation, entrepreneurship, all-round personality, and value system among the students and to foster competitiveness among students
С	To undertake collaborative projects which offer opportunities for long-term interaction with academia and industry
D	To pursue global standards of excellence in all our endeavors namely teaching, research, consultancy, continuing education and support functions

VISION OF THE DEPARTMENT

To produce competent Electronics and Communication Engineers by imparting quality education to meet the industry requirements and for serving the societal needs

MISSION OF THE DEPARTMENT

M1	To develop appropriate facilities for promoting research activities
M2	To inculcate leadership qualities among students for self and societal growth
М3	To nurture students on emerging technologies for serving industry needs through industry institute interface
M4	To enrich teaching learning process by transforming young minds to be resourceful engineers

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO 1	To enable graduates to pursue research, or have a successful career in academia or industries associated with Electronics and Communication Engineering, or as entrepreneurs
PEO 2	To provide students with strong foundational concepts and also advanced techniques and tools in order to enable them to build solutions or systems of varying complexity
PEO 3	To prepare students to critically analyze existing literature in an area of specialization and ethically develop innovative and research-oriented methodologies to solve the problems identified

Engineer	ring Graduates will be able to:
P01	Engineering Knowledge : Apply the knowledge of mathematics, science engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO2	Problem Analysis: Identify, formulate, review research literature, and analyz complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	Design/Development of Solutions: Design solutions for complex engineerin problems and design system components or processes that meet the specifie needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
P04	Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
P05	Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
P06	The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
P07	Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrat the knowledge of, and need for sustainable development.
P08	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	Individual and Team Work: Function effectively as an individual, and a a member or leader in diverse teams, and in multidisciplinary settings.
PO10	Communication: Communicate effectively on complex engineering activities wit the engineering community and with society at large, such as, being able t comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
P011	Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one"s own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
P012	Life-Long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program	Specific Outcomes (PSOs)
After the Engineeri	e successful completion of B.E. Programme in Electronics and Communication ng, the graduates will able to
PSO 1	Use signal processing concepts and tools to provide solutions to real time problems
PSO 2	Use embedded system concepts for developing IoT applications
PSO 3	Use the concepts of analog and digital electronics to design and implement VLSI circuits

Unit – IV **OVERVIEW OF ELECTRICAL, ELECTRONICS AND CONTROL SYSTEMS** ENGINEERING

9

Introduction (L1) - Major Areas of Study (L2): Electrical Power Generation, Transmissions and Distributions, Motors, Lighting Systems, Electrical Appliances, Sensors, Instrumentation and Control Systems, Distributed Multimode Power Generation and Distributed Power Consumption - Historical Perspective (L2) – Few Practical Applications* (L2) : (i) Generators (ii) Transmission Systems (iii) Home Appliances, Rating, Load Estimations, Wiring, (iv) Electrical Appliances (Induction Stove, BLDC Fan vs Ordinary Fan) – Recent Developments / Current Areas of Research (L2).

Introduction (L1) – Control Systems Layout, Open Loop and Closed Loop, System Responsive or Time Constant, - Few Practical Applications* (L2): Various types of Control Systems: Mechanical, Pneumatic, Electrical, Electronic (Microprocessor based), Embedded Control Systems, PLCs, SCADA, Computer Based Control Systems.

Unit – V **OVERVIEW OF ELECTRONICS AND COMMUNICATION ENGINEERING** 9 Introduction (L1) – Major Areas of Study (L2): Electronic Devices and Circuits, Analog Electronics, Digital Electronics, Embedded Systems, Integrated Circuits & VLSI – Historical Perspective (L2) – Few Practical Applications* (L2): (i) Audio Systems, (ii) Washing Machine, (iii) Automotive Electronic Systems – Recent Developments / Current Areas of Research (L2)

Introduction (L1) – Major Areas of Study (L2): Signal Processing, Analog and Digital Communication, Data Communications and Networking – Historical Perspective (L2) – Few Practical Applications* (L2): (i) Text to Speech / Voice to Text Application in Google Search, (ii) Wired Communications Network, (iii) Wireless Communications Network, (iv) Satellite Communications, (v) IoT Communications Network - Recent Developments / Current Areas of Research (L2).

Unit – VI **OVERVIEW OF COMPUTER SCIENCE AND ENGINEERING**

6

Introduction (L1): Evolution of Computers / Generation Computers – Major Areas of Study (L2): Computer Hardware, Programming Languages, Operating Systems, Application Software, Database Management Systems (DBMS), Computer Networks, Internet and Computer Security, Web Technology, Social Media, Mobile Application- Recent Developments / Current Areas of Research (L2): Artificial Intelligence (AI) and Machine Learning (ML), Internet of Things (IoT), Block Chain, Big Data Analytics, Cyber Security, Cloud Computing.

* Purpose or Use, Actual System (Photo), Layout or Block Diagram, Description, Operational Aspects and Inputs/Outputs are to be taught (Descriptive level only).

Total: 45 PERIODS

OPEN ENDED PROBLEMS/QUESTIONS

Course specific Open Ended Problems will be solved during the classroom teaching. Such problems can be given as Assignments and evaluated as Internal Assessment (IA) only and not for the End semester Examinations.

	e Outcomes: completion of this course, the students will be able to:	BLOOM'S Taxonomy						
CO1	Identify the major areas and relate their current trends in Civil Engineering.	L2-Understand						
CO2	Explain the principles behind various mechanical systems and components.	L2-Understand						
CO3	Identify different Electricals and Control Systems applied in the Engineering L2- field.							
CO4	Relate the various Electronics and Communication Engineering Systems involved in real life.	L2-Understand						
CO5	Understand the components of Computer Hardware, Software, and Operating Systems and their applications in real life.	L2-Understand

Preprocessor Directives: Introduction(L2) - File Inclusion(L3) - Macro Definition(L3) - Conditional Compilation(L3). Command Line Arguments(L3) - Variable Length Arguments List(L3).

TOTAL: 45 PERIODS

LIST OF EXPERIMENTS/EXCERCISES:

1.	Implementation of algorithm, flowchart and pseudo code to solve simple problems.
2.	Implementation of if, if-else, nested if and switch statements.
3.	Implementation of while, do-while and for loops.
4.	Implementation of sorting and searching algorithms.
5.	Implementation of one-dimensional array, passing array to functions and array operations.
6.	Implementation of programs for implementing various string operations like "copy", "finding length", "compare", "concatenate" with and without built-in library functions.
7.	Implementation of pointer operators, call by reference, pointers with array.
8.	Implementation of function calls, recursion, call by value.
9.	Implementation of structure and nested structure.
10.	Implementation of array of structures.

11. Implementation of file operations.

OPEN ENDED PROBLEMS / QUESTIONS

Course specific Open Ended Problems will be solved during the classroom teaching. Such problems can be given as Assignments and evaluated as Internal Assessment (IA) only and not for the End semester Examinations.

	SALEM	TOTAL: 75 PERIODS
	e Outcomes: completion of this course the students will be able to:	BLOOM'S Taxonomy
CO1	Formulate the algorithmic solutions for a given computational problem.	L2 - Understand
CO2	Demonstrate simple programs using basic constructs.	L3 - Apply
CO3	Develop and implement algorithms for a given problem using array and pointers.	L3 - Apply
CO4	Develop and implement applications in C using functions and structures.	L3 - Apply
CO5	Design applications using sequential and random-access file processing.	L3 - Apply

		(COMMON TO ALL BRANCHES)				
Progr Branc	ramme &	B.E. – ELECTRONICS AND COMMUNICATION CP ENGINEERING 4	L O	Т 0	P 4	C 2
		Physics Laboratory	U	•	-	-
Cours	se Objective					
1.	To learn the	e proper use of various kinds of physics laboratory equipment's.				
2.	To learn pro data.	oblem solving skills related to physics principles and interpretation	of e>	perin	nental	
3.	To determin	ne error in experimental measurements and techniques used to m	inimi:	ze suc	h errc	or.
4.	To explain a	all experiments some practical usage in real world.				
List	of Experime	ents / Exercises				
1.	-	endulum - Determination of rigidity modulus of wire and moment of	of ine	rtia of	regul	ar
2.	Uniform be	nding – Determination of Young's modulus.				
3.	Non-unifor	m bending - Determination of Young's modulus.				
4.	Air wedge -	Determination of thickness of a thin sheet/wire.				
5.		ibre -Determination of Numerical Aperture and acceptance angle t disc- Determination of width of the groove using laser.				
6.	Determinat	ion of band gap of semiconductors.				
7.	LASER – De	etermination of the wavelength of the LASER using grating.				
8.	Study expe	riment on application of physics in a real time problem - 1.				
9.	Study expe	riment on application of physics in a real time problem - 2.				
10.	Study expe	riment on application of physics in a real time problem - 3.

	Chemistry Laboratory								
Cours	se Objectives:								
1.	To inculcate experimental skills to test basic understanding of water quality para acidity, alkalinity, hardness, DO, chloride and copper.	ameters, such as							
2.	To make the students to familiarize with electroanalytical techniques such potentiometry and conductometry in the determination of impurities in aqueous sol	• • • •							
3.	To demonstrate the analysis of metals and alloys.								
List	of Experiments / Exercises								
1.	Estimation of alkalinity in water sample using Na_2CO_3 as primary standard.								
2.	Determination of total, temporary & permanent hardness of water by EDTA method.								
3.	Determination of dissolved oxygen content of water sample by Winkler's method.								
4.	Determination of chloride content of water sample by argentometric method.								
5.	Determination of strength of given hydrochloric acid using pH meter.								
6.	Determination of strength of acids in a mixture of acids using conductivity meter.								
7.	Conductometric titration of barium chloride against sodium sulphate (precipitation tit	tration)							
8.	Study experiment on application of chemistry in a real time problem – 1.								
9.	Study experiment on application of chemistry in a real time problem – 2.								
10.	Study experiment on application of chemistry in a real time problem – 3.								
	Total	I: 30 PERIODS							
	rse Outcomes: n completion of this course the students will be able to:	BLOOM'S Taxonomy							
CO1	Identify the quality of water samples with respect to their acidity, alkalinity, hardness and dissolved oxygen.	L3 – Apply							
CO2	Determine the amount of metal ions through volumetric and spectroscopic techniques.	L3 – Apply							
CO3	Use the graphical models to analyze laboratory data.	L3 – Apply							
CO4	Equipped with basic knowledge on conductivity meter for measurement of conductance of water sample.	L3 – Apply							
CO5	Make use of the electroanalytical techniques to identify the impurities in solution.	L3 – Apply

Cour	se Objecti	ves:					
1	To practio	e welding, sheet metal and machine assembly.					
2	To practio	e basic building plan, pipelining and wood work.					
3	To practio	e electric wiring and precautions for household applications and Por	wer g	ene	ratio	n.	
4	To practio	e soldering and develop the electronic device for household applica	tions.	l			
LIS	T OF EXPE	RIMENTS/EXERCISES:					
		GROUP – A (MECHANICAL& CIVIL)					
		MECHANICAL ENGINEERING PRACTICES			15		
ΜΟΙ	DULE 1	HANDS-ON EXPERIMENT					
	1	Make a Steel Chair using Welding Technique.					
	2	Make a Plain turning and Facing using Lathe.					
	3	Make a given component using sheet metal.					
		STUDY EXPERIMENTS (IDENTIFICATION OF PARTS, FUNCT	IONS	6 OF	EA	СН	
MO	DULE 2	COMPONENT, INTEGRATION AND OVERALL WORKING)					
	1	Study of Thermal Power Plant (Steam Boiler) or Air-conditioning	syste	ems.			
	2	Study of Various Machines & Machining Processes.					
	3	Study of an Automobile – Two Wheeler/Car.					
		CIVIL ENGINEERING PRACTICES			15		
ΜΟΙ	DULE 1	HANDS-ON EXPERIMENT					
	1	Construct a water flow pipelining network for a residential buildir	ng.				
	2	Fabricate a given truss using wooden planks.					
	3	Construct a residential building as per given building drawing us	ing m	our	t		
	3	board/Thermocol sheet.					
MOI	DULE 2	STUDY EXPERIMENTS					
	1	Study of an Approved building plan and various details.					
	2	Study of a Highway network and various elements. \mathcal{O}					
	3	Study of construction materials and its usage in building constru-	ction.				
		GROUP – B (ELECTRICAL& ELECTRONICS)					
		ELECTRICAL ENGINEERING PRACTICES			15		
ΜΟΙ	DULE 1	HANDS-ON EXPERIMENT					
	1	House Wiring (3-pin socket, staircase wiring, Lamp load, MCB, E	nergy	/ me	eter,	fuse)
	2	Series and Parallel Connection of UPS Batteries and Solar Panel.					
	3	Assembly of water level indicator using Arduino.	-1				
MO	DULE 2	STUDY EXPERIMENTS					
	1	Study of Solar Power Generation.					
	2	Study of 22kV/440V Step-down Transformer at Power House.					
	3	Study of Electrical Household Appliances (Washing Machine, Elec	ctric k	Cettl	e, Ir	nduct	tion
	5	Stove(anyone))					

		ELECTRONICS ENGINEERING PRACTICES	15
MOD	ULE 1	HANDS-ON EXPERIMENT	
	1	LED brightness changing systems based on ambient light.	
	2	Digital thermometer with LCD Display.	
	3	Voltage regulator for domestic applications.	
MOD	ULE 2	STUDY EXPERIMENTS	
	1	Study of Audio system.	
	2	Study of AM and FM Transceiver.	
	3	Study of LED TV.	
	4	Study of overall Information and Communication Technology (ICT) of KIOT (Internet Infrastructure).) functional structure

	ourse Outcomes: pon completion of this course, the students will be able to:				
CO1	Overcome the influence of bad habits and develop good habits.	L2 – Understand			
CO2	Practice the values and ethics and lead a happy and healthy life.	L2 – Understand			
CO3	Demonstrate interpersonal skills and work with others effectively	L2 – Understand			
CO4	Deliver effective presentations for better communication.	L2 – Understand			
CO5	Work as a team for the successful completion of the projects	L2 – Understand

TLP instructions : (i) Unit I, II, III will be taught using External Resource Persons on three working days

(ii) Unit IV and V will be taught by internal faculty, One period / week (in Timetable)

Assessment

- : (i) It will be an audit course and there is no credit.
 - (ii) Qualitative assessment will be carried out

Beyond Knowledge

(Common to ALL BRANCHES)

Course Objectives:

Α.	CONCEPT
5	skills in higher semesters and final semester project work.
2	To take entrepreneurship, product development, startup-related activities and problem-solving skills in higher semesters and final semester project work.
2	To enable students to design, fabricate and demonstrate of a given application using PCB.
1	To understand the basics of real-world applications.

Engineering Clinic laboratory provides hands-on training for students to develop certain simple real-world products or applications with the help of faculty. It is a team activity consisting of maximum 3 students per team. A list of products or applications will be given. Engineering Clinic - I focus on product development involving Electronics Engineering. Apart from electronic system design the course module has the design and fabrication of Printed Circuit Board (PCB) as well. Each team can choose one or more products for a given application. The students have to design, fabricate and demonstrate the working of the product.

B. EXECUTION

Day	Session Course content / Activity				
1	S 1	Introduction to Electronics components.	4		
T	S 2	Functioning of Electronic components and circuits.	4		
2	S 3	Hands-on Training to design electronic circuits using open- source software.	8		
S 4		Fabrication of PCB.	4		
2	S 5	Assembling and Soldering of Electronic components in PCB.	4		
2	S 6	Testing and Validation of the circuit.	6		
	list of com	nple applications/products is attached. Total	30 Periods		

C. ASSESSMENT

i. Assessment is done by Internal mode only and there is no End Semester Examination.ii. Marks distribution for Infernal Assessment is,

Method	Review I	Review II	Review III	Review IV
Details	Designing of Electronic circuits using open-source software	Fabrication of PCB	Assembling and Soldering of Electronic components in PCB	Testing, Validation and Demonstration
Marks	25	25	25	25

For Product/Application the student team can choose themselves.

Total: 30 PERIODS

Cours	BLOOM'S	
Upon	completion of this course the students will be able to:	Taxonomy
CO1	Understand the Basics of electronic components.	L2
CO2	Design, Fabrication and Demonstration of the prototype of Electronic product using PCB.	L4
CO3	Practice the culture of Innovation and Product Development towards Start-ups in an Institution.	L4

	1–Low, 2–Medium, 3–High.														

SALEM

Knowledge

List of sample Applications / Products for Engineering Clinic I

- 1. Water level indicator in a tank.
- 2. Automatic solar light circuit.
- 3. Rain alarm indicator.
- 4. Fire alarm sensor.
- 5. LPG gas leakage detector.
- 6. Air quality measurement.
- 7. Automatic sanitizer dispenser.
- 8. Automatic doorbell ringer.
- 9. Miniature of Home / Buildings / Bridges.
- 10. Miniature of Hydraulic Jack / Air Pump / Steam power electricity model.
