KNOWLEDGE INSTITUTE OF TECHNOLOGY, SALEM

(An Autonomous Institution)

Approved by AICTE, Affiliated to Anna University, Chennai. Accredited by NBA (CSE, ECE, EEE & MECH), Accredited by NAAC with 'A' Grade

KIOT Campus, Kakapalayam – 637 504. Salem Dt., Tamil Nadu, India.

B.E. / B.Tech. Regulations 2023

B.E. - Mechanical Engineering

Curriculum and Syllabi

(For the Students Admitted from the Academic Year 2023 – 2024 onwards)

Version: 1.0	Date: 09.09.2023

KNOWLEDGE INSTITUTE OF TECHNOLOGY(AUTONOMOUS), SALEM

Approved by AICTE, Affiliated to Anna University, Accredited by NAAC and NBA (B.E.: Mech., ECE, EEE & CSE)

CHOICE BASED CREDIT SYSTEM AND OUTCOME BASED EDUCATION

B.E. - MECHANICAL ENGINEERING

VISION OF THE INSTITUTE

• To be a world class institution to impart value and need based professional education to the aspiring youth and carving them into disciplined world class professional who have the quest for excellence, achievement orientation and social responsibilities.

MISSIC	N OF THE INSTITUTE
Α	To promote academic growth by offering state-of-art undergraduate, postgraduate and doctoral programs and to generate new knowledge by engaging in cutting – edge research
В	To nurture talent, innovation, entrepreneurship, all-round personality and value system among the students and to foster competitiveness among students
С	To undertake collaborative projects which offer opportunities for long-term interaction with academia and industry
D	To pursue global standards of excellence in all our endeavors namely teaching, research, consultancy, continuing education and support functions

VISION OF THE DEPARTMENT

To create competent and industry relevant Mechanical Engineers with professional and social values to meet global challenges.

MISSIO	MISSION OF THE DEPARTMENT									
M1	Enabling environment for effective teaching - learning and research to meet global challenges.									
M2	Motivating students to pursue higher education and to excel in competitive examinations and entrepreneurship.									
М3	Establish a continuous Industry Institute Interaction to make the students employable.									
M4	Inculcate the students leadership quality with ethical values and spirit of team work.									

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)											
PEO 1	Graduates will apply the knowledge of Mechanical Engineering to solve real world Engineering problems.										
PEO 2	Graduates will have the required attributes to pursue advanced education in Engineering and Technology.										
PEO 3	Graduates will have the leadership skills with ethical values and team spirit.										

PROGRA	M OUTCOMES (POs)
Engineer	ing Graduates will be able to:
P01	Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO2	Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
PO4	Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
PO6	The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
P07	Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO8	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO10	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
P011	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
P012	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcomes (PSOs)											
After the successful completion of B.E. Programme in Mechanical Engineering, the graduates will able											
to	to										
PSO 1	Apply the knowledge of Computer Aided Design and Computer Aided Engineering tools to										
	design and analyze the products and process related to Mechanical Engineering systems.										
	Develop the knowledge and skill relevant to Heating, Ventilation and Air-Conditioning										
PSU 2	industries.										
PSO 3	Exhibit the ability to make a product related to Mechanical Engineering and allied										
	engineering fields.

PHYSICS FOR MECHANICAL ENGINEERS

8

(FOR MECHANICAL ONLY)

		(I OK PLECHANICAL ONLY)								
Prog	ramme &		СР	L	Т	Ρ	С			
Bran	ch	B.E MECHANICAL ENGINEERING	3	3	0	0	3			
Cour	Course Objectives:									
1	To gain knowle	To gain knowledge about properties of materials and its applications.								
2	To instill knowledge on classical mechanics of multiparticles.									
3	To gain knowle	ge of thermal physics and its applications.								
4	To learn the foundational knowledge in crystal physics and semiconductors.									
5	To know the basic of laser and new engineering materials.									
Imp for (Importance of Physics for Mechanical Engineering – Course outline (Not for examination).									

UNIT-I

PROPERTIES OF MATTER

Units and dimensions (L2), Elasticity (L1) – stress (L1), strain (L1), modulus of elasticity (L1), stressstrain diagram and its uses (L2) - factors affecting elastic modulus and tensile strength (L2) – Poisson's ratio (L2) - bending of beams (L1) - bending moment (L2) – cantilever: theory and experiment (L3) – uniform and non- uniform bending: theory and experiment (L3) - I-shaped girders (L1) - torsion pendulum: theory and experiment (L2).

UNIT-II	MECHANICS		NON	8
Forces in nature (L1) - Newton's law of moti	on (L1) - Multi-particl	e dynamics (L2), Center of mass (CM)

(L2) – CM of continuous bodies (L2), theorems of Moment of Inertia (L2) – moment of inertia of continuous bodies (L2) – Equations of motion (L1) - Types of Damping (L1) - Damped vibration (L1) - gyroscope (L1).

UNIT– III	THERMAL PHYSICS	9				
Modes of transmission	on of heat (L1) - conduction, convection and radiation (L1) - L	aw of Thermodynamics				
(L1), Maxwell relations (L2), Phase Change Processes, enthalpy, entropy and Gibbs function (L2) -						
thermal expansion o	f solids and liquids (L1) - thermal conductivity - Forbe's an	d Lee's disc method:				

theory and experiment (L3) - applications: heat exchangers, ovens and solar water heaters (L2).

UNIT – IV	CRYSTAL PHYSICS AND SEMICONDUCTORS	9

Lattice (L1) - unit cell (L1), crystal systems (L1), Bravais lattice (L1), Miller indices (L3) - coordination number and packing factor for SC, FCC, HCP (L3) - Direct & indirect band gap semiconductors (L1) -Intrinsic semiconductor (L1) – Carrier concentration in intrinsic semiconductor (L3) - Energy band diagram (L1) - extrinsic semiconductors (Qualitative) (L1) – Applications: Sensors and Transducers (L2), LED (L2).

UNIT-V	LASERS AND NEW ENGINEERING MATERIALS	9					
Principle of laser inversion (L2) - glasses - prepa characterization	(L1) - characteristics (L2) - Spontaneous and stimulated emission Nd-YAG laser (L2), CO ₂ laser (L2) – applications of lasers in ind ination, properties and applications (L2) - Shape memory and applications (L2) - Nanomaterials – properties, preparation an	on (L2) - population lustry (L2) - Metallic alloys: Processing, id applications (L2).					
	OPEN ENDED PROBLEMS / QUESTIONS						
Course specific Op given as Assignme	en Ended Problems will be solved during the class room teaching. ents and evaluated as IA only and not for the End semester Exami	Such problems can be nations.					
		Total : 45 PERIODS					
Course Outcome Upon completion	BLOOM'S Taxonomy						
CO1 Apply fund Engineerir	Apply fundamental concepts related to the properties of matter to solve Engineering problems.						
CO2 Demonstr	ate Newton's law of motion for multi particle dynamics.	L2 - Understand					
CO3 Apply the problems.	Apply the basic concepts of thermal conductivity to solve engineering problems.						
CO4 Relate var	ious types of crystal structure and semiconductors.	L2 - Understand					
CO5 Compare	various types of materials and lasers based on their applications.	L2 - Understand

	BE23CY201	ENGINEERING CHEMISTRY	ERING CHEMISTRY Version: 1.0												
		(COMMON TO ALL BRANCHES)													
Pro Bra	gramme & nch	B.E MECHANICAL ENGINEERING	СР 3	L 3	Т 0	P 0	C 3								
Cou	rse Objectives:														
1	To illustrate the	boiler feed water requirements, related problems and water	treati	nent	tecł	nniqu	ies.								
2 To impart knowledge on the Preparation, properties and applications of engineering materials.															
3 To elaborate the Principles of electrochemical reactions, redox reactions in corrosion of materials a basics of polymers.															
4 To outline the principles and generation of energy in batteries and fuel cells.															
5	To introduce the	concepts of industry safety precautions and its standards.													
UNIT-IWATER AND ITS TREATMENT9															
- ex prob alum (L2)	 expression of hardness (L1) - units - estimation of hardness of water by EDTA (L2) - numerical problems (L2) - treatment of boiler feed water (L1) - Internal treatment (phosphate, colloidal, sodium aluminate and calgon conditioning) (L2) external treatment(L2) - Ion exchange process, zeolite process (L2) - desalination of brackish water (L2) - Reverse Osmosis (L2). 														
UNI	T-II	NANO MATERIALS AND PREPARATIONS			9										
Appl mate betw elect nanc	ications of nanon erial for smart scr veen molecules, trical, mechanical oparticle, nanoclus	naterials in medicine, agriculture, energy, electronics and een (LED, LCD & OLED) (L1). Fundamentals of nano scien nanomaterials and bulk materials (L1) - Size-depende and magnetic) (L1)-Types of nanomaterials-Definition, pro- ter, nanorod, nanowire and nanotube (L2) - Preparation of r	cata ce - nt pi opert nanom	ysis Basic Toper Ies a nater	(L2) s: D ties nd u ials). Op istin (op uses (L2).	otical ction tical, of –								
UNI	T- III	ELECTROCHEMISTRY AND POLYMERS			9										
Elect elect cher elect Clas Func (L2)	Electro chemistry; Need and applications (L1). Electrochemical cell (L1) – redox reaction (L1) – electrochemical series and its significance (L1) – Nernst equation (L2). Corrosion- causes- factors- types-chemical, electrochemical corrosion (galvanic, differential aeration), corrosion control (L2) – electrochemical protection (L2) – sacrificial anode method (L2). Polymers; Need and applications (L1) Classification of polymers (L1) – Natural and synthetic; Thermoplastic and Thermosetting (L1). Functionality – Degree of polymerization. Preparation, properties and uses of Nylon 6,6, and Epoxy resin (L2)														
UNI	UNIT – IV BATTERIES AND FUEL CELLS 9														
Batte batte batte Micro	Batteries: Need and applications (L1). Energy storage devices classification (L1) – Batteries - Types of batteries, Primary battery (L1) – dry cell, Secondary battery (L1) – lead acid battery (L2) - lithium-ion battery (L2) - Electric vehicles introduction – working principles (L2) - Fuel cells - H ₂ -O ₂ fuel cell (L1) - Microbial fuel cell - Super capacitors (L1) - Storage principle (L1) - types and examples (L2).														

UNIT	-V	CHEMISTRY, ENVIRONMENT AND WASTE MANAGEMENT	9
Chemi	cal pollution (L2)	– Norms and Standards (L1) – Safety Precaution (L2) – Impo	ortance of Green
chemis	stry - E-wastes a	nd its management (L2) - Carbon foot print and its calculation	ns (L2) - CO ₂
emissio	on and its impac	t on environment (L2) – Techniques for CO_2 emission reductio	n (L2).
		OPEN ENDED PROBLEMS / QUESTIONS	
Course	specific Open E	nded Problems will be solved during the class room teaching.	Such problems can
be give	en as Assignmen	ts and evaluated as IA only and not for the End semester Examination examples and the semester examination of the semester examination of the semi-semi-semi-semi-semi-semi-semi-semi-	minations.

MOE	DULE 2	STUDY EXPERIMENTS									
	1	Study of Solar Power Generation.									
	2	Study of 22kV/440V Step-down Transformer at Power House.									
	3 Study of Electrical Household Appliances (Washing Machine, Electric Kettle, Induction Stove(anyone))										

		ELECTRONICS ENGINEERING PRACTICES	15									
MOD	ULE 1	HANDS-ON EXPERIMENT										
	1	LED brightness changing systems based on ambient light.										
	2	Digital thermometer with LCD Display.										
	3	Voltage regulator for domestic applications.										
MOD	ULE 2	STUDY EXPERIMENTS										
	1	Study of Audio system.										
	2	Study of AM and FM Transceiver.										
	3	Study of LED TV.										
	4	Study of overall Information and Communication Technology (ICT) functional structure of KIOT (Internet Infrastructure).										
			Total: 60 PERIODS									
Cours Upon	e Outco comple	omes: tion of this course the students will be able to:										
CO1	Perform	n basic welding and sheet metal.										
CO2	Perform	n basic building plan, pipelining and wood work.										
CO3	Perform	n electric wiring and precautions for household applications.										
CO4	Perform	n soldering to develop an electronic device for household applications	5.

(COMMON TO ALL BRANCHES EXCEPT B.TECH CSBS)

Programme &	P.E. MECHANICAL ENGINEEDING	СР	L	Т	Ρ	С
Branch	D.E MECHANICAL ENGINEERING	2	1	1	0	2

Course Objectives:

1	To enable learners to improve their language competency.									
2	2 To help learners comprehend documents in a professional context.									
3	To develop learners' skills in a professional framework.									
4	4 To strengthen learners' public speaking skills.									
5 To improve the interpersonal skills of the learners.										

UNIT-I FUNCTIONAL GRAMMAR

Concept: Usage of Prepositions (L1) - Degrees of Comparison (L2) - Subject-verb Agreement (L2) - If Conditional Clause (L2) - Reported Speech (L2) - Common errors in English usage (L1). **Activity:** Practice using worksheets.

UNIT-II READING FOR INFORMATION

Concept: Comprehending a passage (L2) - identifying a topic sentence (L2) - find specific information and prepare notes (L3) - classify the information (L2) - reading texts, essays and summarizing, Reading Technical Articles (L2) - Company Profile (L1).

Activity: Reading daily news - Reading comprehension.

UNIT-III EXTENDED WRITING

Concept: Interpretation of charts – Pie chart, Bar chart, Flow chart (L3) - Dialogue Writing ((L2) - Writing research article (L3) – Project proposal (L2) - Official letters: Joining report, Placing order, Letter seeking clarification (L3), Acknowledging prompt/quality service (L3).

Activity: letters of inviting guest - accepting / declining offer.

FIELD STUDY

UNIT – IV FOCUS ON SPEAKING SKILL

Concept: Conversation Practice in real life situations (L3) - Describing process (L2) - Pronunciation practice (L3) - Strategies of Speaking (L1) - Speaking about Scientists / Celebrities, Narrating the place of visit (L2) - Movie / book review (L2) - Compering an event (L3) - Delivering welcome address / Proposing vote of thanks (L3).

Activity: Conducting mock event.

UNIT-V

Concept: Over view of field study (L1) - Objective(s) of the survey (L1) - Methodology (L2) - Designing a questionnaire (L3) - field survey / interview techniques (L3) - Collection of data (L3) - Summarizing the data (L3) - Presentation (L3).

Activity: Based on certain specific objective(s), 3-5 persons in the society need to be interviewed - team event: 1/2/3 students per team; each team has to make a presentation.

ENGINEERING CLINIC - I

Version: 01

(COMMON TO ALL BRANCHES)

Programme &	B.E MECHANICAL ENGINEERING	СР	L	Т	Ρ	С
Branch	B.E MECHANICAL ENGINEERING	2	0	0	2	1
Course Ohiost	h				P C 2 1	

Course Objectives: 1 To understand the basics of real-world applications. 2 To enable students to design, fabricate and demonstrate of a given application using PCB. 3 To take entrepreneurship, product development, startup-related activities and problem-solving skills in higher semesters and final semester project work.

A. CONCEPT

Engineering Clinic laboratory provides hands-on training for students to develop certain simple real-world products or applications with the help of faculty. It is a team activity consisting of maximum 3 students per team. A list of products or applications will be given. Engineering Clinic - I focus on product development involving Electronics Engineering. Apart from electronic system design the course module has the design and fabrication of Printed Circuit Board (PCB) as well. Each team can choose one or more products for a given application. The students have to design, fabricate and demonstrate the working of the product.

B. EXECUTION

Day	Session	Course content / Activity	No. of Periods
1	S 1	Introduction to Electronics components.	4
T	S 2	Functioning of Electronic components and circuits.	4
2	S 3	Hands-on Training to design electronic circuits using open- source software.	8
	S 4	Fabrication of PCB.	4
2	S 5	Assembling and Soldering of Electronic components in PCB.	4
2	S 6	Testing and Validation of the circuit.	6
		Total	30 Periods

A list of sample applications/products is attached.

C. ASSESSMENT

i. Assessment is done by Internal mode only and there is no End Semester Examination.ii. Marks distribution for Infernal Assessment is,

Method	Review I	Review II	Review III	Review IV				
Details	Designing of Electronic circuits using open-source software	Fabrication of PCB	Assembling and Soldering of Electronic components in PCB	Testing, Validation and Demonstration				
Marks	25	25	25	25				
For Product/Application the student team can choose themselves.								

Total: 30 PERIODS

Course	BLOOM'S		
Upon c	Taxonomy		
CO1	Understand the Basics of electronic components.	L2- Understand	
CO2	Design, Fabrication and Demonstration of the prototype of Electronic product using PCB.	L4 -Analyze	
CO3	Practice the culture of Innovation and Product Development towards Start-ups in an Institution.	L4 - Analyze
